DETAILED ACTION

Drawings

The drawings were received on April 22, 2005. These drawings are accepted.

Allowable Subject Matter

Claims 1-11 are allowed.

The following is a reprinting of the statement of reasons for the indication of allowable subject matter from the Office Action dated February 25, 2005: The prior art fails to disclose or render obvious a liquid manure spreading tool bar for use on a manure spreader having a tank for transporting manure, a manure pump having an inlet located within the tank and an outlet located outside said tank. A liquid manure distributor is mounted onto a supporting frame, and has an inlet for receiving manure and at least one outlet. The frame is mounted so that it can be raised and lowered. A vertically extending telescopic conduit made of a rigid material has one end connected to the outlet of the pump and another end connected to the inlet of the distributor so as to feed the manure pumped from the tank to the distributor, regardless of the vertical position of the frame relative to the tank.
